

Loader Backhoe Operator

Training Program Outline

Goal

Following established safety practices, precautions and operating procedures, trainees will be able to operate the loader backhoe to perform a variety of functions at the Neptune terminal.

Program Description

Through classroom instruction and hands-on loader backhoe training, this program provides trainees with knowledge of general, operational and site specific safety precautions and responsibilities, loader backhoe equipment and operating techniques, in addition to building operator skills. Trainees are expected to successfully complete a knowledge-based assessment and to demonstrate an established standard of performance for each operating skill including equipment inspection, start-up, general operating tasks such as transporting material, bulldozing, grading, digging and dredging, and shut-down.

Pre-requisites

Educational

None
